SPLE-PROPELLING STEAM FIRE ENGINE. -The Philadelphians have just come into possession of a new steam fire engine, built by Messrs. LEE & LARNED, of New York, which propels itself without the aid of horses or hands. The engine weighs about 9,000 pounds. The papers say that she can throw 300 gallons of water in a minute. She has four supply screws for plugs, a sucking screw, and two forcing screws. Her pumps are rotary, and if supplied with water from plugs can throw a stream over two hundred feet, through the open hose. The engine is under complete control when passing through the streets, makes no noise while "locomoting," can turn on a pivot if necessary, can be stopped much quicker than horses can be checked, and can make any speed from that of a smail to fifteen miles an hour. The North American, giving an account of the journey by rail of the engine from New York to Philadelphia, says that she was taken from the cars at Bristol and put upon the turn-

# Another Slep Forward in Barbarism—Inter-esting Decision. From the Journal of Commerce.

The High Court of Errors and Appeals in Mississippi, the Court of last resort in that State, has decided that a free negro of another State cannot take property by will in Missis-

State cannot take property by the sippi.

The opinion was concurred in by Chlef Justiae Smith and Judge Harris. Judge Hardy dissented. The grounds upon which the majority rested are stated in a condensed form, in the Mississippian, of Friday last.

The course of the reasoning appears to be this: In the absence of a positive law in tims: It can assente of a positive has force within the State, the citizens or inhabitants of other States have no other rights within the State, except those resulting from the comity of nations.

Under the Constitution of the United States,

negroes are incapable of becoming citizens; but are of an inferior class, towards whom there is no comity under the law of nations. Their legal character is that of alien strangers

observation of a suitable board of officers.— Among other guns, the rifle-cannon invented by ex-Senator General Charles T. James, is to be experimented with. The experiments with this new arm at Governor's Island and at Springfield, Mass., seem to warrants with this new counter recorded to the land and at Springfield, Mass., seem to warrant a trial where a greater range can be had.
It is said that the James shot and gun has a
greater range than the Armstrong gun, and
is free from some of the objections to that
gun. It is claimed, also, by some, to excel
the Napoleon gun. The improvement consists chiefly in the shot, which, at the moment of explosion, is expanded by the gases,
so as to fill, without abrabing, the grooves
of the rifle gun. The experiments at Springfield were made with a twelve pound gun,
the shot weighing thirteen pounds, and the field were made with a twelve bound cun, the shot weighing thirteen pounds, and the charge of powder being one pound and a quar-

A good printer will set 8,000 cms a day, or about 24,000 letters. The distance traveled by his hand will average one foot per letter, in going to the boxes in which they are contained, and of course returning, making two feet for every letter. This would make a distance cach day of 48,000 feet, or a little more than nine miles, and in the course of the year, leaving out Sundays, the member travels about 3,000 miles. Truly this is hand-power.

what all the got for taking care of his immense property was his board and clothes. One of the "solids" of Cincinnat force no better, and yet counts his notes by millions! Mr. Longworth gets his board and clothes only—and yet he paid into the county treasury last year, in the way of taxes, the sum of \$37,570.56. Rather expensive boarding and clothing.

The extent of Mr. Longworth's property may be judged by the number of pieces of real estate which he owns in that city alone. In looking over the tax duplicate, says the Cincinnati Gazette, we found that he was assessed upon three handred and sixty-six pieces of property in his own name, within the city limits, and that he paid the taxes upon forty-six other lots which have been leased. Four hundred and twelve houses and lots, and vacant lots in all! THE PROPELLER ROCKET ASHORE-HER Rocket, Capt. Rice, of the New York Central on an island in the Wisconsin River. Two Railway Line, with a full cargo of merchan- trains had evidently passed over him, as the dise and Railroad iron, from Buffalo and place where the blood was, and the spot Cleveland, for this city and Unicago, ran where his remains were found, when the ashore about 2 miles beyond the North Point Light House, in a dense fog, on Saturday some rods apart. He is said to have been a morning at I o'clock. It is stated that the magnet of the compass became influenced by the Railroad iron on board, and through this means and the heavy fog prevailing at the time, the boat got so near the shore that the first intimation the captain had of his dangerous situation was hearing the surf. Steam wishing to compare our maternal contempo hardly been done when she struck upon a attributing the harmlessness of his bite on

upon forty-six other lots which have been leased. Four hundred and twelve houses and lots, and vacant lots in all!

The total value of this property now can hardly be estimated. Six years ago, in 1855, when the last valuation was made for assessment purposes, the 366 lots footed up an aggregate of \$1,348,730! A portion of the lots have doubled in price since their last valuation, and others have advanced two hundred per cent in value. Many have doubless remained at about the same figures as in 1858. His present residence on Pike Street, Belmont Place, is put down on the tax roll at \$187,300. On Monday he paid his semi-unnual tax, which amounted to \$18,785:28.

In addition to his property inside the corporation, he owns a considerable amount beyond the city limits. His personal property is taxed at \$163,840. To look after all these looses and lands—to watch the titles, and pay the taxes—to receive the rents and thousand griovances of dissatished tenants—for nishes labor enough, and hard labor too, for even an energetic Jerseyman. Our western millionaire certainly carns his bread and clothes.

Mixing or the Babes.—The Weaverville (Cal.,) Journal gives the following cacount of an affair which, however it may
move the laughter of our readers, we fancy
to have made some of the parties concerned.
"laugh on the wrong side of their mouths:"

"Some time ago thers was a dancing party
given "ap north;" most of the ladies present
had little babies, whose noisy perversity required too much attention to permit the
mothers to enjoy the dance. A number of
gallant young men volunteered to watch the
young ones while the parents indulged in a
breakdown." No sooner had the women left
the babies in charge of the mischievous devtis, than they stripped the infants, changed
their clothes, giving to one the apparel of another. The dance over it was time to go
home, and the mothers herriedly took each a
baby, in the dress of her own, and started,
and were far on their way before daylight.—
But the day following there was a prodigious
row in that settlement; mothers discovered
that a single day had changed the sex of their
babes; observation disclosed startling physiological phenomena, and then commenced
some of the tallest female pedestrianism; livmix the babies, and as many months to retake
the baby mixers to venture within the terricorrection.—A Tough Stoday,—Benjamin Gay, a citizen of Alaffa, in

Liverpeat, received by the steamer Hungarian vesterday, says the great advantage of
the Fatther Point station was clearly demonstrated on the arrival of the steamer Hungarian, which thanks to your fiberal supply of
news from that station, placed us in possession of the obest of the news taken out by
the steamer North Briton, in the short space
of 18 days after the said news left this Point.

MONDAY MORNING: JULY 11, 1859.

Republican State Convention. A Republican State Convention will be held at the City of Madison, in the Assembly Hall of the Capitol on Wednesday, the Sist day of August next, at 12

o'clock M., for the purpose of nominating candidates for State officers to be supported by the party at the ensuing general election; and to transact any other business that may properly come before it.

As the subject of selecting delegates to the next Na ial Convention may be entertained and acted on by the Convention, it is suggested that the people in their

primary caucuses, and the district conventions make such expression as will indimare to their delegates and the State Convention, the general sentiment of the State Each Assembly District will be entitled to two delegates in the Convention. It is recommended that District Conventions for the

er before the rith day of August, and that committees make early calls for that purpose; and it is equecially urged that every district be duly represented in the Convention.

The Rights of Adopted Citizens. naturalized citizens, visiting Europe:

Battiralized offizens, visiting Europe:

Much has been said with relation to the position of
Gen. Cass, taken in a recent letter written by him, on
the rights of naturalized clikkens. Since of the leading
German papers have beaped a great amount of investive upon the shoulders of then. Cass, for incredy expressing his opinion in an official capacity, which opinton was neverly a timely admostition to either as off orders,
him was neverly a timely admostition to either as offineless
birth, that they should not place themselves within the
ceach of any government to whom they might owe military service, at the time they emigrated to this country.
The admonition is well timed. Those persons who belong to any of the belligerent nations of Europe, ought
out to return to their native countries pending the prethis government in difficulty. It has been said by many illustrious emigracis, that haropeans sought this country that they much be freed transpersually and the littled persecution. If such a little persecution, it such a little persecution, and the little persecution, and involve the country that chiefle them from those persecutions in a war with European powers. Again we say, that the letter of Gen. Case is timely and properly admonitory. The policy of the Chilo is pence—not war. The columns of tien. Case on this question are not, however, a certain index to the child such as the column is pence—in two. The policines of then. Case on this question are not, however, a certain index to the child received in this government in the precises, and the expediency of admonition at the present the choid recommend itself to the foreign intelligence that has become american through the forms of law.

This is cold comfort for adopted citizens, and considering the obligations the Denne.

and considering the obligations the Democratic Party are under to that class of voters, is anything but grateful.

The Terms of Pardon,

As the time approaches for the gathering of the Democratic State Convention, the Bu-CHANAN organs are cracking their whips about the ears of the Douglas "traitors," by way of caution as to how they conduct them-Selves at Madison. The Wankesha Democrat, one of the most zealous Administration papers in the State, thus talks to the News, Patriet, and other Douglas journals: SHALL THE TRAITORS BE FORGIVEN? -- AS

SHALL THE TRAITORS BE FORGIVEN?—As the time approaches for closing up the Democratic ranks for the context of 1860, these relefficies members of the Democratic party who have been antigonistic to President Birchanan and the National Democracy should height to realize the folly of their trachery.—They have labored early and late to weaken Mr. Bushanan's inflaence with his party and a distract and divide that political organization that has given them position and name. Two years of unceasing attempts and unscrupulous schemes have passed over the heads of would-be but not-wanting leaders willout accomplishing either of their designs, and we optic it is high time that they were fully sensible that the mass of the party will not commit treachery against the Administration. It is reported that the rehelilous spirits are anxious for a "reconciliation." We trust the rumor may be frue, but cannot discover what levily they can ask or expect, expect to be admitted to the fold of the party son condition that they promise idelity to its principles. An enemy in ambush is more dangers for another great contest with the opposition it is very proper that no enemies be tolerated in our ranks. Two Lake Vessels Arrived Out.—The Cleveland Herald, of Wednesday evening, says that letters have been received in that city, announcing the arrival of two lake vessels which loaded at this city, and left on their voyage about the 10th of May. The schooner J. F. Warner arrived at Cork June 17th, having made the trip from Quebec within twenty-one days. On the 19th of June, two days afterwards, the schooner R. H. Harman arrived at Cork, after a run of twenty-three days, which is also a remarkably quick trip. The J. G. Deshier had not arrived. These vessels are the first which had arrived in Europe from the lakes this season. The cargo of the Warner has been sold in Glasgow, and a return trip of Scotch pig-iron engaged for Cleveland. She will sail on return as speedily as possible. The cargo of the Harman would probably be sold in Liverpool.

Record of Railroad Disasters.

From the S. Y. Herold,

From the N. Y. Herold,

It is fearful to review the record of railroad disasters which have occurred in the United States for the past six years. Here is a terrible catalogue of bloody tragedies which have paralyzed the public mind for a brief time, and then have been forgotten save by the surviving triends of the victims whose hearths have been made desolate. Since 1853 the following railroad disasters have occurred in this country:

Here we have, in the brief space of 6 years nearly four hundred human beings hurried to a terrible death, and over six hundred more cruelly mained, and all "by accident," we are coolly assured. Some of these disasters were attended with anusual horrors, over far reflected with anusual horrors. ters were attended with annusual horrors, even for a railroad calamity, always marked by appaling incidents. For example, the disaster on the North Pennsylvania Railroad, July 17, 1856, occurred to an excursion train of children belonging to the Catholic schools of Philadelphia, which came into solilision with another train, and converted a day devoted to jay and lestivity into one of agony and death. So also the collision on the Susquehauna Railroad, within nine miles of Baltimore, on the 4th of July, 1854; both trains were filled with people who had started for pleasure, and met only mutilation and despair.

Mr. Lyman Steel and sister-in-law, Miss Lampson, of Woodbridge. Mr. Sign, the owner of the boat, was also lost. The names of the blates the there we have not yet learned.

There have been but three bodies recovered up to the halest intelligence—Miss Louiss of the alterny. Mrs. Nelson Turner, and Mrs. Danforth Berry.

This sad casualty brings grief to the hearts of the mimerous friends of the deceased; they were all respected and beloved by a large circle of acquaintances, who will deaply mourn their tess. The calamity succeeding. aster a few years ago, when upon a false alarm of fire the children rushed down the stairrance way, which gave way, causing the death of a large number of the "innocents." Our herone is said to have saved all her pupils by that presence of mind that shines in her face, and to have then heaped from a third story window. Whether in so doing the broke both her legs, irreparably damaged her lovely nose, and forever dimnad one Instrous eye. I am not told. My own belief is that she came out unscathed and unharmed, and at once proceeded to Brady's, who photographed her and thus gave her unparabled linearnents to immortality on a bank note. I am further she married the "man of her choice," (she never would do anything else.) and is now the happy mother of "four small children and one at the breast." Of course you'll take no stock in this theory of mine, and if you are bent on further investigation, I can only refer you to our engravers, who can possibly put you on the track. Whose hands clutch the sworthill so grindy.

The brave heads, late lifted, are solemnly bowed, And the riderless chargers stand quivering and comed. As the burial requirem is chanted aloud.

The grouns of the death-stricken drowning;
While Victory looks on, like a fuseur pale and proud,
Who waste till the morrow her crowning. There is no mocking blazon, as clay sinks to clay

Far away, tramp on tramp, peals the trarch of the foc-like a storm-wave's retreating—spent, into and slow, With sound like their spirits that faint as they go By you red-glowing river whose waters Shall darken with sorrow the land where they flow To the eyes of her desolate daughters. They are fied—they are gone; but, oh! not as they

came,
In the pride of those numbers they anaked on the game,
Nevermore shall they shand in the vanguard of fame,
Never lift the stained wrond which they drew;
Nevermore shall they hast of a glorious name,
Never march with the feat and the true, Where the wreck of our legions lay stranded and form, They side on our ranks in the mists of the mora; take the giant of finas their strength; it was shorn. See those mists had rolled up to the sky; From the Hash of our steel a new day-break seemed.

As we sprung up—to compact or dis. The tunual is silenced: the death lots are east; And the herces of boath are slumbering their had. Do ye dream of you pale form that rode on the blast? Would ye free it once more, 0 ye brave? Yes: the broad road to honor is red where ye passed. And of giory ye assed but—a grave.

A ED with disease unnecessarily lose much time. No remedy, in these days, is fit to be taken in the human system, unless it will in a lew days exhibit some laworable symptoms of restoring the patient to health. RADWAY'S READY RELIEF, for all nature pains, instantly proves its efficacy. The moment it is applied the most execuciating pains are relieved and the most evenual trivitations thinged. If Bloom mistan, or Stiffness of the Joints, or Weakness in the Back, or Lumbungo, or Pain in the Side, or Dysentery or Biarrhoek trouble you, Radway's Ready Relief will just to wind the Side, or Dysentery or Biarrhoek trouble you, Radway's Ready Relief will just to wind the Side, or Dysentery of Relief and the most exercised with a draft of air from a fan immediately over this lower furnace, and about seven feet above is the upper furnace. This is connected to the lower furnace days, Radway's Regulators on roing to hed.

the waste heat from the lower furnace pas between eight rows, of six cash, on its way These bricks become heated and transmit

their heat to the ore and coal poured into them—the oar and coal being pulverised the heat sets forth the carbon which enters the ore and decarbonizes it. As the impurities pass off as gases, the top of the tubes being open, and the carbon being in such small particles, and in such close contact with the ore, also in small particles, and given the re, also in small particles, and given the ime (48 hours,) the work must needs be horoughly done without waste of materiat.

there (48 hours) the work houst heeds be thereughly done without waste of material.

On being dropped into the lower furnace it is therefore Pig Iron in small particles.— Watching it closely as it fell, the coal seemed converted to coke, which helps to heat the metal till it is consumed. The metal is then showed up mearer the bridge or greatest heat of the fire, when it is operated the same as any other iron; and when every particle has absorbed oxygen, it is then mailcable and is rolled into balls for the squeezer.

The whole improvement consists in not only making Pig metal with the waste heat of the furnace, but avoiding that anomaly in the manufacture of Pig Iron of carboarising with charcoal and oxydizing with an air blast, at the same time causing a waste of material and large amounts of fuel to overcome it.—In hot blast furnaces part of this waste is overcome, as part of the oxygen is consumed before entering the blast furnace.

The time given it (48 hours) seems to have

overcome, as part of the oxygen is consumed before entering the blast furnace.

The time given it (48 hours) seems to have the effect to evaporate all the sulphur, (which has ever been the bug-bear of all attempts heretofore to make good iron with sulphurous coal, for which iron has a great affanity,) without waste of material; as the product, 51 per cent, is nearly as much as the Pig metal that cambe produced out of the same ore (55 at the Mountain works.)

An examination of the muck bars shows that it is all ibrous; not a crystal in it, which are abundant in all cold short irous, and is attributed to the sulphur in the coal with which it is worked.

The muck bar has also another property which will make it especially valuable for rails, that is, of welding at a very low heat. The bars made as above, while rolling were doubted and welded at about a "cherry-1" red" host. The fault of English rails, scaling, is because of the imperfect weld separating the top part from the middle portion of the rail.

the rail.

The persons selected to inspect the process of manufacture at St. Louis, observe:

"We charged 16 pairs of tubes (82) with 1,869 pounds of iron ore from the Iron Mountain, and 3,747 pounds of crushed Illinois coal, from the Wenona Mines, watching these for forty-eight continuous hours, when the one being "carbonized," was let down (in pairs of tubes to a heat) and worked similarly to boiling. Weighing carefully the proitarly to boiling. Weighing carefully the product of the identical tubes thus charged by us, we found the net yield to be six thousand one hundred and three (6,103) pounds of muck bar, or equal to fifty-one and forty-two hundredths (51 42-100) per cent. of pure iron from the raw ora iron from the raw ore.

"From a detailed statement of the expense

ncurred in making this product, we su the zoltowing:

took is consumption and yield of 24 hours for our results.

"To test its yield we charged a heating furnace with 1,105 lis. of short piles (7 high,) and its yield was 987 lbs. of merchant bur iron. The loss of weight (say 11 per cent ) and other expense of rolling (say 85) makes the cost of the bar iron 27 66-100 per ton of 2,240 lbs., or at a net cost of 1 1-4c per lb. "We have made no allowance for wear and tear or contingencies, but have endeavored as near as possible to get at the net cost—the gross cost would be about \$25 per ton for muck lar, or \$33 per ton of merchant har—a price much less than the English bar can be made for at home, and certainly of a superior quality.

"We have had the bar iron cut up into pieces for experimental tests. It shows for itself, and well-self.

pieces for experimental tests. It shows for itself, and we have no hesitation in pronouncing it bar iron of a superior quality, which means neither cold short nor red

We shall look with much interest to the result of the above process when it shall have become well established; for no one thing would do more at the present day for TILTERS: FILTERS: PILTERS: the safety of railway travelling, and for railway EDZIES RAIN WATER FILTERS are received and for sale as Blair & Persons new page.
